SUBJECT and TITLE INDEX

SPE TRANSACTIONS
Volume 1
1961

Adhesives

Cryogenic Adhesive Properties of Bisphenol-A Epoxy Resins, M. J. Hiza and P. L. Barrick, *National Bureau of Standards, p. 73*

Cellulose Acetate Butyrate

Mechanisms of UV Stabilization of Plastics, J. H. Chaudet, G. C. Newland, H. W. Patton, and J. W. Tamblyn, *Tennessee Eastman Co., p. 26*

Some Functions of 2-Hydroxybenzophenones as Weathering Stabilizers for Polymers, J. H. Chaudet and J. W. Tamblyn, *Tennessee Eastman Co., p. 57*

Creep Studies

Thermomechanical Studies of Amorphous and Crystalline Polymers, A. V. Sidorivich and E. V. Kushinsky, *Inst. for High Molecular Compounds, Academy of Sciences, USSR, p. 9*

Curing Agents

Cryogenic Adhesive Properties of Bisphenol-A Epoxy Resins, M. J. Hiza and P. L. Barrick, *National Bureau of Standards, p. 73*

Hydroxy Alkyl Phosphate Esters as Curing Agents for Epoxy Resins, Marjorie C. St. Cyr, *Picatinny Arsenal, p. 47*

Resins from Cyclohexene Oxide Derivatives and Fatty Acids, C. W. McGary, Jr. and C. T. Patrick, Jr., *Union Carbide Chemicals, p. 143*

Crystallization Studies

Effect of Hydrostatic Pressure on Polyethylene Melt Rheology, R. F. Westover, *Bell Telephone Lab., p. 14*

Dielectric Properties

Dielectric Properties of Plasticized Melamine Resins, W. C. Schneider, *American Cyanamid Co., p. 68*

Electrical Resistivity

A Study of the Polymerization of Thermosetting Polymers by Electrical Resistivity Techniques, R. W. Warfield and M. C. Petree, *U.S. Naval Ordnance Lab., p. 3*

Electrical Resistivity of Polymers, R. W. Warfield and M. C. Petree, *Naval Ordnance Lab., p. 80*

Electron Microscope Studies of Polymers

An Investigation of Some Variables Affecting Impact Resistance of Thermoplastics, E. G. Bobalek and R. M. Evans, *Case Institute of Technology, p. 93*

A New Interpretation of the Glass-Coupling Agent Surface Through the Use of Electron Microscopy, S. Sterman and H. B. Bradley, *Union Carbide Corp., p. 224*

Epoxies

Cryogenic Adhesive Properties of Bisphenol-A Epoxy Resins, M. J. Hiza and P. L. Barrick, *National Bureau of Standards, p. 73*

Hydroxy Alkyl Phosphate Esters as Curing Agents for Epoxy Resins, Marjorie C. St. Cyr, *Picatinny Arsenal, p. 47*

Resins from Cyclohexene Oxide Derivatives and Fatty Acids, C. W. McGarry, Jr. and C. T. Patrick, Jr., *Union Carbide Chemicals, p. 143*

Explosives

Hydroxy Alkyl Phosphate Esters as Curing Agents for Epoxy Resins, Marjorie C. St. Cyr, *Picatinny Arsenal, p. 47*

Extrusion

Flow Patterns in a non-Newtonian Fluid in a Single-Screw Extruder, W. D. Mohr, J. B. Clapp and F. C. Starr, *Du Pont Co., p. 113*

Polyethylene Flow Data from Melt Viscometer and Commercial Extruder Measurements, H. P. Schreiber, *Canadian Industries Ltd., p. 86*

The Effect of Extrusion Variables on the Fundamental Properties of Tubular Polyethylene Film, N. D. Huck and P. L. Clegg, *Imperial Chemical Industries Ltd., p. 121*

Film

The Prediction of Liquid Permeation in Polyethylene and Related Polymers, Morris Salame, *Plax Corp., p. 153*

The Thermodynamics of Biaxial Elongation, Richard S. Stein, *University of Massachusetts, p. 164*

Glass-Resin Interface Phenomena

A New Interpretation of the Glass-Coupling Agent Surface Through Use of Electron Microscopy, S. Sterman and H. B. Bradley, *Union Carbide Corp., p. 224*

Glass to Finish Thickness and Finish to Resin, William J. Eakins, *DeBell & Richardson, p. 214*

Interaction of Organic Monomers and Water with Fiberglass, K. Geutfreund and H. S. Weber, *Armour Research Foundation, p. 191*

Physical Techniques Used in Studying Interfacial Phenomena, Robert L. Patrick, *Alpha R. & D., p. 181*

The Chemistry of Chromium Complexes used as Coupling Agents in Fiberglass Resin Laminates, Paul C. Yates and John W. Trebilcock, *E. I. du Pont de Nemours & Co., p. 199*

The Degree of Bonding Between Coupling Agents and Glass Filaments, William J. Eakin, *DeBell & Richardson, p. 234*

High Temperature Resins

Inorganic-Organic High Polymers, Phenoxyaldehyde Resins of Titanium (IV) and Hafnium (IV), R. J. Landry and E. H. Bartel, *U.S. Naval Ordnance Test Station, p. 139*

Impact Resistance

An Investigation of Some Variables Affecting Impact Resistant Thermoplastics, E. G. Bobalek and Robert M. Evans, *Case Institute of Technology, p. 93*

Melamine Resins

Dielectric Properties of Plasticized Melamine Resins, W. C. Schneider, *American Cyanamid Co., p. 68*

Methyl Methacrylate

An Investigation of Some Variables Affecting Impact Resistant Thermoplastics, E. G. Bobalek and R. M. Evans, *Case Institute of Technology, p. 93*

The Strength of Glassy Polymers, J. P. Berry, *General Electric Co., p. 109*

Inorganic-Organic High Polymers, Phenoxyaldehyde Resins of Titanium (IV) and Hafnium (IV), R. J. Landry and E. H. Bartel, *U.S. Naval Ordnance Test Station, p. 139*

Impact Resistance

An Investigation of Some Variables Affecting Impact Resistant Thermoplastics, E. G. Bobalek and Robert M. Evans, *Case Institute of Technology, p. 93*

Melamine Resins

Dielectric Properties of Plasticized Melamine Resins, W. C. Schneider, *American Cyanamid Co., p. 68*

Methyl Methacrylate

An Investigation of Some Variables Affecting Impact Resistant Thermoplastics, E. G. Bobalek and R. M. Evans, *Case Institute of Technology, p. 93*

The Strength of Glassy Polymers, J. P. Berry, *General Electric Co., p. 109*

NMR Spectroscopy

Some Functions of 2-Hydroxybenzophenones as Weathering Stabilizers for Polymers, J. H. Chaudet and J. W. Tamblyn, *Tennessee Eastman Co., p. 57*

Permeability

The Prediction of Liquid Permeation in Polyethylene and Related Polymers, *Morris Salame, Plax Corp., p. 153*

Physical Properties

Dynamic Measurement of Mechanical Moduli 1, Armand F. Lewis and Marvin C. Tobin, *American Cyanamid Co., p. 177*

Physical Techniques Used in Studying Interfacial Phenomena, Robert L. Patrick, *Alpha R & D., p. 181*

The Effect of Extrusion Variables on the Fundamental Properties of Tubular Polyethylene Film, N. D. Huck and P. L. Clegg, *Imperial Chemical Industries Ltd., p. 121*

Polyesters

Utraviolet Degradation of Plastics and the Use of Protective Ultraviolet Absorbers, R. C. Hirt, N. Z. Searle, and R. G. Schmitt, *American Cyanamid Co., p. 21*

Polyethylene

Effect of Hydrostatic Pressure on Polyethylene Melt Rheology, R. F. Westover, *Bell Telephone Lab., p. 14*

Mechanisms of UV Stabilization of Plastics, J. H. Chaudet, G. C. Newland, H. W. Patton, and J. W. Tamblyn, *Tennessee Eastman Co., p. 26*

Polyethylene Flow Data from Melt Viscometer and Commercial Extruder Measurements, H. P. Schreiber, *Canadian Industries Ltd., p. 86*

Some Functions of 2-Hydroxybenzophenones as Weathering Stabilizers for Polymers, J. H. Chaudet and J. W. Tamblyn, *Tennessee Eastman Co., p. 57*

The Effect of Extrusion Variables on the Fundamental Properties of Tubular Polyethylene Film, N. D. Huck and P. L. Clegg, *p. 121*

The Effect of Molecular Weight Distribution on Flow Properties of Polyethylene, D. R. Mills, G. E. Moore and D. W. Pugh, *U.S. Industrial Chemicals Co., p. 40*

The Prediction of Liquid Permeation in Polyethylene and Related Polymers, Morris Salame, *Plax Corp., p. 153*

Thermodynamic Diagrams for Polyethylene Resins, J. M. Lupton, *Du Pont Co., p. 105*

Thermomechanical Studies of Amorphous and Crystalline Polymers, A. V. Sidorovich and E. V. Kushinsky, *Inst. for High Molecular Compounds, Academy of Sciences, USSR, p. 9*

Ultraviolet Degradation of Plastics and the Use of Protective UV Absorbers, R. C. Hirt, N. Z. Searle, and R. G. Schmitt, *American Cyanamid Co., p. 21*

Polymerization

Dielectric Properties of Plasticized Melamine Resins, W. C. Schneider, *American Cyanamid Co., p. 68*

Study of the Polymerization of Thermosetting Polymers by Electrical Resistivity Techniques, R. W. Warfield and M. C. Petree, *U.S. Naval Ordnance Lab., p. 3*

Polymers

New Frontiers in the Field of Macromolecules, Giulio Natta, *Polytechnic Institute of Milan, p. 147*

Polymers as Conductors and Semiconductors, S. M. Atlas, M. Becher and H. E. Mark, *Bronx Community College and Polytechnic Institute of Brooklyn, p. 169*

The Strength of Glassy Polymers, J. P. Berry, *General Electric Co., p. 109*

Thermomechanical Studies of Amorphous and Crystalline Polymers, A. V. Sidorovich and E. V. Kushinsky, *Inst. for High Molecular Compounds, Academy of Sciences, USSR, p. 9*

Polypropylene

Thermomechanical Studies of Amorphous and Crystalline Polymers, A. V. Sidorovich and E. V. Kushinsky, *Inst. for High Molecular Compounds, Academy of Sciences, USSR, p. 9*

Ultraviolet Degradation of Plastics and the Use of Protective UV Absorbers, R. C. Hirt, N. Z. Searle and R. G. Schmitt, *American Cyanamid Co., p. 21*

Polystyrene

An Investigation of Some Variables Affecting Impact Resistant Thermoplastics, E. G. Bobalek and Robert M. Evans, *Case Institute of Technology, p. 93*

The Strength of Glassy Polymers, J. P. Berry, *General Electric Co., p. 109*

Ultraviolet Degradation of Plastics and the Use of Protective UV Absorbers, R. C. Hirt, N. Z. Searle, and R. G. Schmitt, *American Cyanamid Co., p. 21*

Polyurethane

A Study of the Weathering of an Elastomeric Polyurethane, C. S. Schollenberger and K. Dinbergs, *B. F. Goodrich Co., p. 31*

Polyvinyl Chloride

An Investigation of Some Variables Affecting Impact Resistant Thermoplastics, E. G. Bobalek and R. M. Evans, *Case Institute of Technology, p. 93*

Ultraviolet Degradation of Plastics and the Use of Protective UV Absorbers, R. C. Hirt, N. Z. Searle, and R. G. Schmitt, *American Cyanamid Co., p. 21*

Processing

The Effect of Molecular Weight Distribution on the Flow Properties of Polyethylene, D. R. Mills, G. E. Moore, and D. W. Pugh, *U.S. Industrial Chemicals Co., p. 40*

Radiation

Effect of Gamma Radiation on Chemical Structure of Plastics, V. J. Krasnansky, B. G. Achhammer and M. S. Parker, *National Bureau of Standards, p. 133*

Rheology

Effect of Hydrostatic Pressure on Polyethylene Melt Rheology, R. F. Westover, *Bell Telephone Lab., p. 14*

Flow Patterns in a Non-Newtonian Fluid in a Single-Screw Extruder, W. D. Mohr, J. B. Clapp and F. C. Starr, *Du Pont Co., p. 113*

Polyethylene Flow Data from Melt Viscometer and Commercial Extruder Measurements, H. P. Schreiber, *Canadian Industries Ltd., p. 86*

The Effect of Molecular Weight Distribution on the Flow Properties of Polyethylene, D. R. Mills, G. E. Moore, and D. W. Pugh, *U.S. Industrial Chemicals Co., p. 40*

Thermal Resistance

A Method for Determination of Maximum Heat Resistance of Plastics, I. F. Kanavetz and L. G. Batalov, *USSR, p. 63*

Thermodynamic Properties

The Thermodynamics of Biaxial Elongation, Richard S. Stein, *University of Massachusetts, p. 164*

Thermodynamic Diagrams for Polyethylene Resins, J. M. Lupton, *Du Pont Co., p. 105*

Thermoset Polymers

A Method of Determination of Maximum Heat Resistance of Plastics, I. F. Kanavetz and G. Batalov, *USSR, p. 63*
A Study of the Polymerization of Thermosetting Polymers by Electrical Resistivity Techniques, R. W. Warfield and M. C. Petree, *U.S. Naval Ordnance Lab., p. 3*

Plastics Research

Research is Key to Progress in the Plastics Industry, Foster D. Snell, *Foster D. Snell, Inc., p. 52*

Scientific Literature

How Can Scientists Keep up with Science? Eger V. Murphree, *Esso Research and Engineering Corp., p. 56*

Semiconductors

Polymers as Conductors and Semiconductors, S. M. Atlas, M. Becher and H. F. Mark, *Bronx Community College and Polytechnic Institute of Brooklyn, p. 169*

Styrene-Acrylonitrile

An Investigation of Some Variables Affecting Impact Resistant Thermoplastics, E. G. Bobalek and R. M. Evans, *Case Institute of Technology, p. 93*

Test Methods

A Method for Determination of Maximum Heat Resistance of Plastics, I. F. Kanavetz and L. G. Batalov, *USSR, p. 63*

A New Interpretation of the Glass-Coupling Agent Surface Through Use of Electron Microscopy, S. Sterman and H. B. Bradley, *Union Carbide Corp., p. 224*
A Study of the Polymerization of Thermosetting Polymers by Electrical Resistivity Techniques, R. W. Warfield and M. C. Petree, *U.S. Naval Ordnance Lab., p. 3*
A Study of the Weathering of an Elastomeric Polyurethane, C. S. Schollenberger and K. Dinbergs, *B. F. Goodrich, p. 31*
Physical Techniques Used in Studying Interfacial Phenomena, Robert L. Patrick, *Alpha R&D, p. 181*

Ultraviolet Degradation

Ultraviolet Degradation of Plastics and the Use of Protective Ultraviolet Absorbers, R. C. Hirt, N. Z. Searle, and R. G. Schmitt, *American Cyanamid Co., p. 21*

Weathering

A Study of the Weathering of an Elastomeric Polyurethane, C. S. Schollenberger and K. Dinbergs, *B. F. Goodrich, p. 31*
Mechanisms of UV Stabilization of Plastics, J. H. Chaudet, G. C. Newland, H. W. Patton and J. W. Tamblyn, *Tennessee Eastman Co., p. 26*
Some Functions of 2-Hydroxybenzophenones as Weathering Stabilizers for Polymers, J. H. Chaudet and J. W. Tamblyn, *Tennessee Eastman Co., p. 57*
Ultraviolet Degradation of Plastics and the Use of Protective Ultraviolet Absorbers, R. C. Hirt, N. Z. Searle, and R. G. Schmitt, *American Cyanamid Co., p. 21*
